WHY?

OkGlobal Coin SWITCH

Security Coin powered by blockchain tech to take over trillion dollar payment processing, exchange and remittance, banking and finance industry.

Saves merchants **90%** or more from payment processing fees and immediate account reconciliation

Gives consumers a currency that grows year to year.

OkGlobal Coins are protected and guaranteed from total loss and theft.

Profits are reinvested into coin ledger to make all OkGlobal Coins securities that are regulated, insured, audited and backed by real assets used for routine purchases by consumers.

1-year roadmap for investors return expectations.

4TH QUARTER 2020 – 4TH QUARTER 2021

Onboarding/public awareness execution

STEP 1

FIRST LOCATION IN SINGAPORE

SGD 5 million Cap at USD .004/ coin

2 million reserved for investors
3 million for public.
(40/60 split)

STEP 2

SECOND LOCATION IN SAN YSIDRO

Mexico Border Location
(Exemption for limited offerings not exceeding \$5million – Rule 504 of Regulation D)

Prepare new locations
Korea/Japan/Indonesia/
Germany/New York
and others to follow

STEP 3

OPEN KOREA/ JAPAN/ GERMANY/ NEW YORK

USD .008/ coin offering on exchange with pre-screened members in 6 to 8 months after first location Singapore Launched.

All early adopters can double profit.

STEP 4

Open exchange for speculation and sells coins at all locations at speculation price.

PROBLEMS

INFLATION

HIGH FEES (payment processing, currency exchange and remittance, premium financing, etc..)

SLOW ACCOUNT RECONCILIATION

LIMITED USE OF FIAT CURRENCY FROM COUNTRY TO COUNTRY

TRUST, LACK OF INTRINSIC VALUE

MONEY LAUNDERING

INABILITY FOR THE POOR TO PARTICIPATE IN WEALTH CREATION

TRANSPARENCY & ACCOUNTABILITY

PROBLEMS

THEFT VIA ACCOUNT HACKING OR ROBBERY

INACTIVE USE OF FUNDS (LOST FUNDS OR ACCOUNTS FROM DECEASED)

TOTAL LOSS OF VALUE

THREATENING GOVERNMENT ABILITY TO DEFICIT SPEND

GLOBAL TRANSFERRABILITY

FAST, EASE OF USE IN DAILY PURCHASE OF SERVICES AND PRODUCTS

SLOW ADOPTION RATE OF BLOCKCHAIN TECHNOLOGY

OkGlobal Coin SWITCH = SOLUTION

Reinvestment of profits
back into coin ledger

Blockchain simplifies
payment processing

Immediate account reconciliation and
use of funds via phone app or card

Global use available

Backed by real assets that are
audited, insured, guaranteed and
available online for all coin holders
to review.

Coins are traceable and
recorded from and to each
sender and recipient in real
time

Every coin holder is an active beneficiary in the global reinvestment of profits to increase value of each coin.

OkGlobal Coin SWITCH holdings, services, revenue, expenses, etc., audited and fully available online for all participants. Licensed, regulated and insured to meet and/or exceed governing compliance guidelines.

All participants are verified and coins are coded with each owners identification.

Inactive accounts (150 years) or deceased participants with no beneficiary will have coins reinvested back into community coin ledger.

Increasing minimum value in case of complete coin or company collapse backed by verified, audited and insured holdings/investment assets.

OkGlobal Coin SWITCH participation does not impede or reduce government ability to deficit spend but rather gives all citizens a way to participate in the global finance market to offset reduction in value of fiat currency due to inflation/deficit spending.

OkGlobal Coin SWITCH

OkGlobal Coins can be sent to participants globally.

Instant account reconciliation for recipients and senders via a simple phone app, online account tool, or OkGlobal Coin SWITCH service location.

Mass adoption from consumers & merchants is expected due to the reduction of fees, ease of use, free banking, personal service and marketing from OkGlobal Coin SWITCH participant service centers and no contractual obligation along with an ever increasing minimum value of OkGlobal Coin. Beta testing merchant participants have already signed up and are eagerly waiting to begin with OkGlobal Coin SWITCH.

MARKET ADVANTAGE

OkGlobal Coin SWITCH

DEMOCRATIZED
COMMUNITY PROFIT,
INVESTMENT AND
PAYMENT VEHICLE
AVAILABLE NOW.

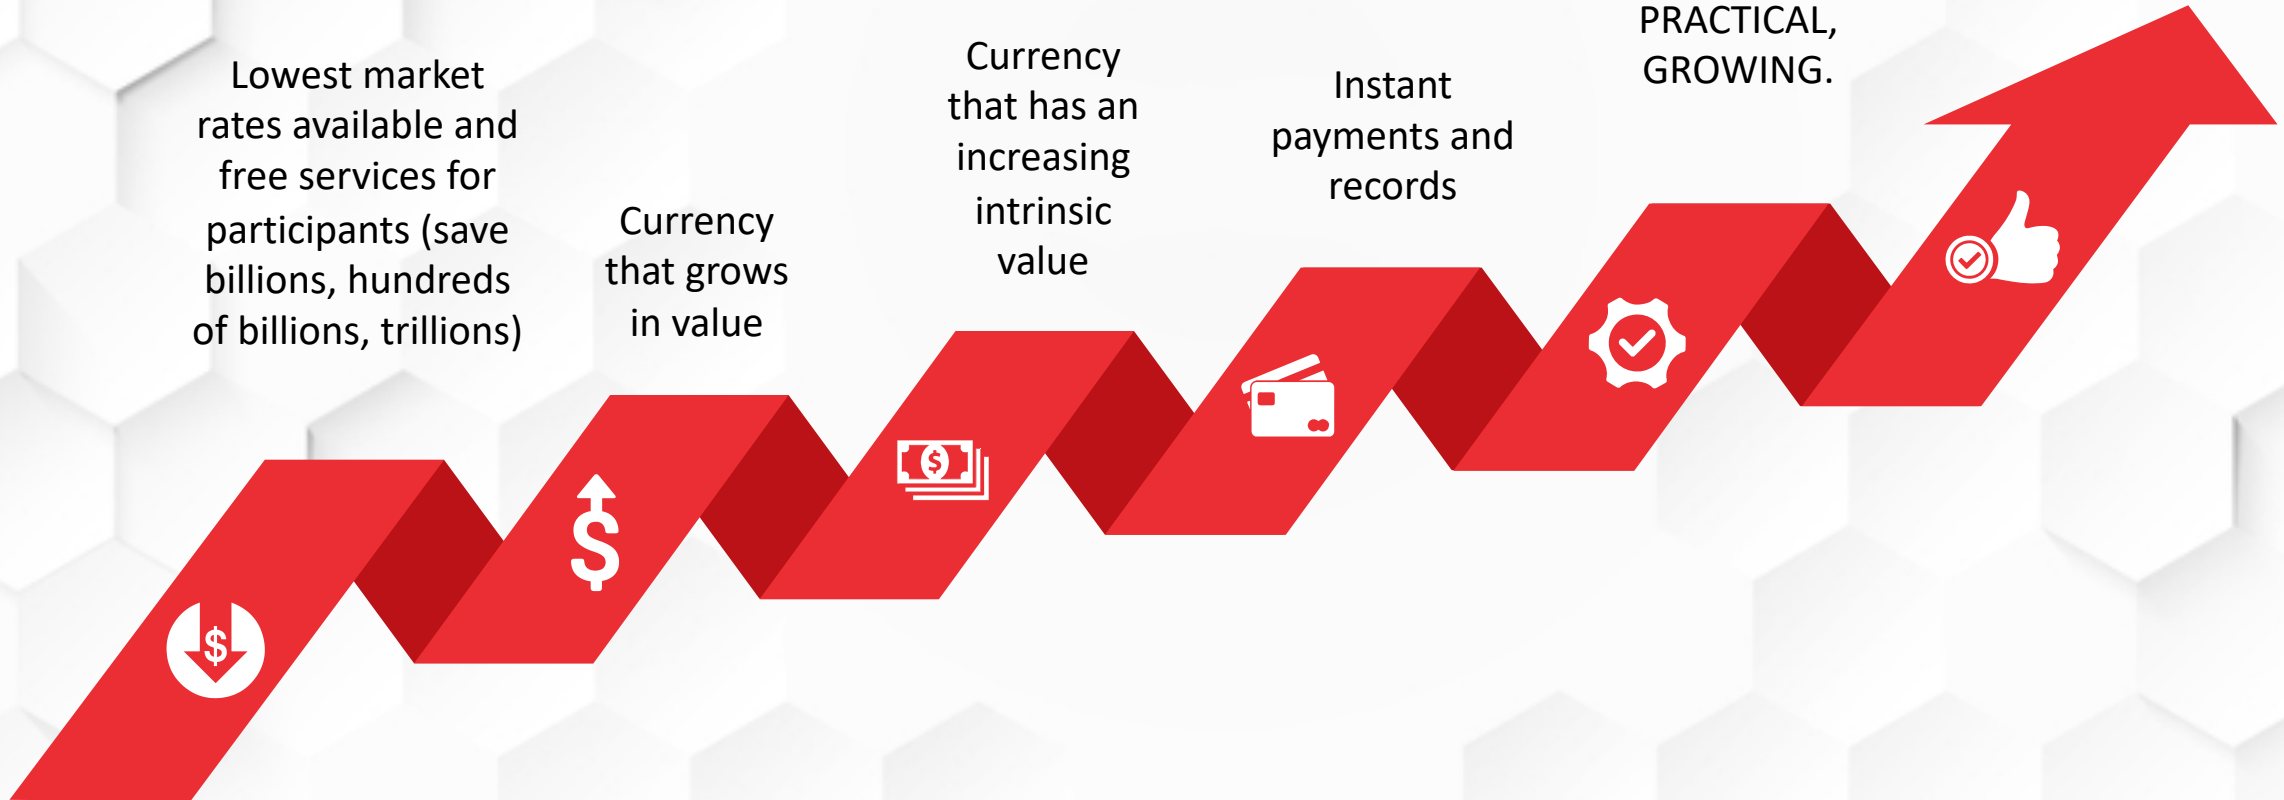

EASIER, CHEAPER,
FASTER,
TRANSPARENT,
PRACTICAL,
GROWING.

Instant
payments and
records

Currency
that has an
increasing
intrinsic
value

Currency
that grows
in value

Lowest market
rates available and
free services for
participants (save
billions, hundreds
of billions, trillions)

EXAMPLE PROFIT STRUCTURE

PAYMENT PROCESSING:

| \$1 billion processed per day X .1% (platform fee) = \$1 million/day in payment processing platform fees

| \$1 million X 365 days = \$365 million total annual net positive (36.5% GROWTH)

| \$365 million = 50% (\$182.5 million) reinvested back into OKGlobal coin holdings to increase annual intrinsic value. 25% (\$91.25 million) available for Payment processing platform and OKGlobal support for company operations. Remaining 25% (\$91.25 million) distributed to participating payment processing platform support nodes

| (TRILLIONS ARE PROCESSED ANNUALLY VIA VISA, MASTERCARD & AMEX)

EXAMPLE PROFIT STRUCTURE

1 YEAR TERM INSURANCE PREMIUM FINANCING:

Term 1 year

| \$1 billion financed at 5.5% for 1 year = \$55 million return from finance earnings

| Late fees are not included in calculation but should be considered to be a significant source of additional revenue.

| Total conservative annual return (without late/management fees) = 5.5% or \$55 million which is reinvested in OKGlobal coin holdings, minus operation costs, to increase intrinsic coin value. Operation costs unknown and must be evaluated prior to setting finance interest charge.

| (U.S. insurance premium finance industry estimated to be between \$30-\$50 billion annually based upon available online industry calculations. Calculation will vary dependent upon addition of personal lines to commercial lines financing.)

EXAMPLE PROFIT STRUCTURE

CURRENCY EXCHANGE/REMITTANCE

I do not see currency/service exchange offices as a significant source of profit, if any, for **OKGlobal coin SWITCH**. Rather, I regard them as locations to service existing participants in **OKGlobal Coin** community, along with adding new participants and serve as an employee hub for platform and financing management.

My preliminary plan is to put these service locations within or near international airport terminals. Travelers will have all necessary documents and will be motivated to participate since we will offer at cost (no profit) currency exchange as an active participant. These offices will be supported from the payment platform and insurance premium financing returns. We will charge the lowest market exchange rates in the industry to non-participants and make whatever revenue from exchange fees we can from the locations.

COMPETITORS

OkGlobal Coin SWITCH

Currently no competitors

Why?

I don't know.

OkGlobal Coin SWITCH blockchain business model and reinvestment structure is globally unique and first.

Shared fair profit distribution for all participants is contrary to global business norms.

SWITCH instant payment protocol coin holder's account structure

Currency deposited and recorded in fiat or crypto in accounts accessible online or at brick & mortar branches. Payments made in choice of fiat or crypto by sender.

Payment process:

Phone app scans receiver's QR code and asks for transmission amount. OkGlobal Coin SWITCH payment app then asks fiat or crypto payment and ticket number. Ticket number is number issued by merchant corresponding to each customer's amount due. Payment app then asks for confirmation to send funds. Funds instantly sent to receiver and sender receives confirmation receipt to present to receiver. Receiver receives funds instantly and a confirmation via phone app or online access. Can print out receipt for both parties if necessary, noting senders QR Code, date, time, amount, and ticket number.

SWITCH payment protocol nodes connected to the blockchain network for hashing, payment processing, double spending prevention, ledger recording, security and tampering prevention. Nodes earn coins based upon value of service for each node. Value will be based upon processing volume tied to speed of transactions.

OkGlobal Coin SUPPLY AND TOKEN MIGRATION

OkGlobal Coin SWITCH

OKGlobal Securities Coin is currently an tomochain trc21 token with a total supply of **100,000,000,000.50 billion** (OkGlobal Coin LLC USA) **50 billion** OkGlobal Coin Pte Ltd (Singapore)

60% will be allocated for investors/STO and the remaining **40%** will be reserved for the development team and founder.

The tomochain block was used to start the **OkGlobal Securities Coin** due to its rapid transaction speed and nominal fees. The token must migrate to its own unique blockchain due to the limited functionality of the tomochain block and to meet our project goals of a decentralized autonomous organization.

There are other plans that I have for **OKGlobal coin, SWITCH & MYID** that I will not communicate in this project summary but will release as the project progresses.

SWITCH Coin SUPPLY AND TOKEN MIGRATION

OkGlobal Coin SWITCH

Switch stable coins are currently an tomochain trc21 token with a total supply of **100,000,000,000**.

SWITCH stable coins are targeted towards merchants and consumers who wish to avoid any volatility in price. Each SWITCH stable coin is 100% backed by SWITCH stable coin reserves to ensure a 1:1 transferability to fiat currency minus blockchain and platform fees when applicable.

As OkGlobal Coins mature and price volatility with OkGlobal Coins become a decreasing concern, we foresee the reduction and ultimately a possible complete phasing out of SWITCH stable coins.

MY IDENTITY COIN SUPPLY AND TOKEN MIGRATION

OkGlobal Coin SWITCH

MY IDENTITY utility coins, has a total volume of 100 billion ethereum(erc20) MYID Coins. The ethereum erc20 blockchain was used to create MYID Coins for ease of access to various funding and trading platforms.

MYID, are utility coins used for the tagging/identification of blockchains with unique owner identifying code. The purpose of tagging blockchains with MYID coin coding is to reduce and ultimately eliminate threat of loss, theft or unfair confiscation.

MY IDENTITY Coins will migrate to its own unique block due to the functionality limitations of the ethereum blockchain.
